

Cleaning Cable Conduit.
To clean the cable road conduit, a special implement has been devised. Its shape is much like a hoe, with a blade resembling that of a domestic meat chopper and made to conform with the shape of the bottom of the conduit, into which it is dropped through the slot. A horse is attached and the accumulation is gathered in heaps and removed through manholes. The operation is a frequent one, as the deposit from the slot from the street is heavy.—New York Herald.

Curious Custom of Japan.
Prince Kitashirakawa, who was commander of the guard of Japan, recently died in Formosa, and according to the curious custom of the country honors were showered upon him after his death. The Emperor has promoted him to the rank of field marshal, has decorated him with the order of the Golden Kite and the Collar of the Imperial Chrysanthemum, and granted him an annual pension of 3000 yen as a recognition of his services during the late war.—Chicago Record.

Why He Declined.
A man named Simmons is said to have declined to become the private secretary of a man named Green for a peculiar reason. The salary was tempting, and the work would have been light and agreeable; but then, as he said, he couldn't bear the thought of signing letters, "Green, per Simmons."—New York Observer.

The Unforeseen.
If we could only foresee, what misery might be prevented. One of the many chroniclers of events in the life of Napoleon says he lost Waterloo from a pain in his back, being unfitted thereby for personal direction of the battle. It is always the unexpected that mars the best anticipations, and thus so many business men, laboring men or women, primed for success, are taken down suddenly. Nothing comes more suddenly than an attack of lumbago to stiffen or twist the muscles of the spine and lay one up. In ten minutes, however, St. Jacobs Oil will cure the soreness and stiffness and make the back supple and strong. If Napoleon could have used this great remedy at the right time, he would have changed, perhaps, the map of the whole of Europe.

Over 200 patents have been issued in the United States for the manufacture of inks.

Five cents saved on soap; five dollars lost on soiled clothes. Is that economy? There is not a cents difference between the cost of a bar of the poorest soap made and the best, which is as all know, Dobbins' Electric.

A Frenchman has patented an apparatus to take off and put on a man's coat.

The Illinois corn crop last year was 267,425,000 bushels.

FOR IRRITATION OF THE THROAT caused by cold or use of the voice, "Brown's Bronchial Troches" are exceedingly beneficial.

The law abolishing dogs of race in Pennsylvania went into effect January 1, 1896.

Come West For Your Seed.

That's what we say, because it's the best. Salzer's Wisconsin grown seeds are bred to earliness and produce the earliest vegetables in the world. Right alongside of other seedmen's earliest, his are twenty days ahead! Just try his earliest peas, radishes, lettuce, cabbage, etc. He is the largest grower of farm and vegetable seeds, potatoes, grasses, clovers, etc.

IF YOU WILL CUT THIS OUT AND SEND IT TO THE JOHN A. SALZER SEED CO., La Crosse, Wis., with 10c. postage, you will get sample package of Early Bird Radish (ready in 16 days) and their great catalogue. Catalogue alone 5c. postage.

A Good Dog Is Worth Looking After.

If you own a dog and think anything of him, you should be able to treat him intelligently when ill and understand him sufficiently to detect symptoms of illness. The dog doctor book written by Dr. Clay Glover, D. V. S., specialist in canine diseases to the principal kennel clubs, will furnish this information. It is a cloth bound, handsomely illustrated book, and will be sent postpaid by the book publisher, H. L. Leonard, 124 Leonard St., N. Y. City, on receipt of 40c. in postage stamps.

FASHION'S REALM.

WHAT IS WORN BY WOMEN IN WET WEATHER AND DRY.

A Practical and Comfortable Waterproof—Stylish Costume for a Girl—Bonnets Made of Black Velvet.

THIS practical and comfortable top garment, illustrated in the large drawing, affords perfect protection in stormy weather without unnecessary weight or other inconvenience. The absence of sleeves (it being shaped in so-called "skeleton" designs) renders it easily adjusted or laid aside. Gray waterproof cloth is the material chosen in this instance, the cape being lined throughout with changeable blue and gold taffeta. The edges are plainly finished, and the cloak is closed all the way down the front with bone buttons, three of a smaller size closing the cape near the top. The fronts are loose-fitting, and join the body back by shoulder, under-arm seams, under-arm darts producing the smooth adjustment at the sides. The back skirt portions are widely lapped and joined to the lower edge of body, straps being provided at the side edges in which tapes or ribbon is inserted to tie around the waist, and thus hold the back in proper position. The back can be left open or closed as preferred. Useful pockets with pointed laps are placed on each front, the edges being stitched in tailor fashion. The cape

of good quality they certainly have their uses.

GIRLS' COSTUME.
Fancy striped novelty goods, shaded in golden brown hues, are here stylishly associated with tabac velvet, the

STYLISH GIRLS' COSTUME.

are shaped with single seams, gathered at the top and arranged over comfortably fitted linings, the wrists being completed by bands of velvet. The circular skirt has the fullness arranged in box plaits at the back, two on each side of the placket, that is made at the top of the centre back

COMFORTABLE WATERPROOF.

extends well below the hips, and is shaped with a dart on each shoulder, it being of fashionable, but not exaggerated width. The rolling collar fits the neck closely, and can be raised if desired. Waterproof cloth in medium or light weight is usually chosen for garments of this kind.

The quantity of 54-inch-wide material required to make this waterproof for a lady having a 32-inch bust measure is 5 1/2 yards; for a 36-inch size, 5 1/2 yards; for a 40-inch size, 5 1/2 yards; for a 42-inch size, 6 yards.

A HANDSOME VELVET BONNET.

This bonnet is of black velvet adorned with black tips, above a crown of shot-pink and blue passementerie. The lining of the poke brim is a

seam. Velvet, ribbon, gimp, satin, or Persian ribbon, bias bands of yoke being simulated by twine-colored lace over yellow satin. The mode is also suitable for dresses of linen batiste and cotton wash fabrics that are already being prepared for the approaching season, trimmed with insertion and edging of embroidery. The full waist is made up over fitted linings on which the material is arranged smoothly at the top, the fullness at the lower edge being gathered at the waist line front and back, drooping in blouse style over the belt in front. Small gilt buttons with buttonholes effect the closing in centre back, and the neck is finished with a close standing collar of velvet. The yoke is laid on over the front in square outline, edged by the bands of velvet, the side bands being finished with gilt flange buttons. The gigot sleeves plaid, or striped silk or woolen material, can be used for decoration on dresses in this style. The added yoke can be omitted if not desired, the trimming giving the same effect. Stylish fancy plaids and claret tartans make pretty dresses, trimmed with dark velvet, in this style, chevrot, camel's hair, cashmere and other woolsens developing attractively.

The quantity of 44-inch wide material required to make this dress for a girl 6 years old is 2 1/2 yards; for a 10-year old size, 3 1/2 yards; for a 12-year-old size, 3 1/2 yards.

MOHAIR STILL POPULAR.

Mohair still retains its popularity as dress goods. It sheds dust so well, and Noah's flood couldn't hurt it, and so it lingers for utility wear. Oddly enough the next favorite, or rather the prime one, is the rough material, such as frieze, boucle and something called tourmaline, which the shop girl said was a Swiss word! Maybe it is. The fabric is rough surfaced and loosely woven, and comes only in black. It is very thick and looks like boucle bunting.

BLACKBIRD GOWNS.

One sees a remarkable number of costumes showing combinations of white. Any and every color is put with it and with a astonishingly good effect.

Black and white has long been in vogue, and is still so much in favor that there are no end of costumes showing this combination. White has a softening effect upon color in every case and is especially charming when made up with pretty soft grays, browns or some of the pretty mixed goods.

FOR SPRING LATS.

Chinese and cloud-like ribbons for trimming spring hats show palm figures on Persian and glaze grounds, shaded leaves in satin broche, iridescent ribbons bordered with velvet, and exquisite Dresden patterns outlined with narrow threads of gold or bronze.

Horseradish as a medicine and condiment is mentioned in the Egyptian records, 2000 years B. C. It is easily grown in almost any part of the world.

By its late census Mexico claims a population of 14,000,000, and 195 cities.

HOUSEHOLD MATTERS.

JAPANESE FURNITURE POLISH.

A furniture polish, said to be exceptionally valuable for its purpose, is prepared by thoroughly mixing together one pint of linseed oil, one pint of strong cold tea, the whites of two eggs and two ounces of spirits of salt. When thoroughly combined pour into a bottle, which must be well shaken before each time the polish is used. A few drops on a soft linen pad is rubbed well over the article to be polished and the finish obtained by vigorous application of a dry chamois skin or old silk handkerchief.—Atlanta Constitution.

SENILE ART OF BEDMAKING.

How few persons there are who really know how to make a bed well, observes the New York Herald.

Out of 100 housemaids ninety-nine will throw the bedclothes down over the foot of the bed, then throw them up again in a few minutes. This should never be permitted. Every article should be taken off and laid separately over a chair, and a strong current of air should be allowed to circulate through the room before the clothes are replaced. The mattress should be turned daily and from end to end, as this insures it being worn more evenly, and it will not sink in the middle, which spoils the looks of any bed, no matter how beautiful its cover.

The new fashion of steel chain springs is a great improvement over the heavy old-style spring, which, when once taken upstairs, was bound to remain there a long time. The careful housewife will cover the springs of her bed with linen, so that it may be taken off and washed. This saves the mattress all chance of rust marks from the metal. Clean newspapers will answer the same purpose.

It is only the hardest sleepers who can enjoy their slumbers when, by a scanty supply of sheet, the blanket scratches face and neck. Narrow bed-clothing is even worse, especially where the barbarous custom of sleeping two in a bed holds good. One drags the clothes one way, the other exhausts strength in clinging to them for dear life, and neither is comfortable. A simple remedy for this discomfort is to place one blanket lengthwise across the bed. In this way there is a double advantage—less weight on the shoulders and plenty of chance for a firm tucking up. Good housemaids are quite liable, in placing three blankets on a bed, to turn down a great piece, giving you six on your shoulders and not one sufficiently tucked in on the sides.

A restless child might be prevented from many a cold if blankets were placed across the bed. It is the careful watch of detail in home life that makes it differ from a hotel, and nothing is more satisfactory than a well-made bed.

COOKING FOR TWO.

"I like housework, but I hate to cook for just two," said Mrs. Young-wife. None but the experienced can fully understand the difficulties which surround the young housekeeper, however practiced she may be, when transplanted from a growing family to her new home. For the benefit of all such, writes Vesta C. Turner, I append a few suggestions and directions which have special bearing toward economy, and venture the assertion that the bride is to be pitied who does not need or who does not wish to practice economy. (Thereon hangs a homily).

Potato Soup—Put a cup of rich milk, a tablespoonful of butter, salt and pepper to taste, in a crock on the stove. Cook your peeled potatoes for dinner in plenty of water. When done pour off the water into the crock, add half a cup of broken crackers and you have a soup for your first course which is as satisfying as oysters, costs next to nothing and is relished by an invalid.

Two or three stalks of asparagus, in season, cut fine, cooked tender, thickened with a spoonful each of butter and flour, rubbed smooth, adding pepper and salt to taste, make enough delicious soup for two.

Tomato Soup—Half a pint of tomatoes, a pint of boiling water; when come to a boil add a pinch of soda; when foaming add two-thirds pint of rich milk, salt, pepper and plenty of butter; when boiling add cup of cracked crumbs; serve at once. The advantage these have over their excellent soups is that they can be prepared in a very few minutes on very busy days or in case of unexpected company.

A nice breakfast dish can be prepared from remnants of boiled ham, chopped fine; cup of dried bread crumbs, season to taste; put in hot buttered saucepan and moistened with a few spoonfuls of milk. A little cold potato can be added if convenient. Have ready one or two hard-boiled eggs, which slice over the top when ready to serve.

Gems—Sift 1 1/2 pints of flour, one teaspoon each of soda and salt, into a crock, pour in rich buttermilk to make a batter rather stiffer than for griddle cakes, beat briskly for half a minute. This quantity will fill a tin gem pan of eight cups; butter the pan and bake in a quick oven. These should be very light and spongy. If an iron pan is used it must be heated very hot before the batter is put in. Gems can be made on top of the stove in iron gem pans by turning as griddle cakes. Use a fork to turn, make the batter thinner and fill the cups only half full. A hot gem makes a wholesome dessert by breaking in two and serving in half with canned strawberries or other juicy fruit.

A quart of cream is too little to put into a churn, but you can make butter by putting it into a self-sealing half-gallon fruit can. Screw the lid on, put a folded towel in the bottom of a wooden bucket, partly fill with cold water, set the can rock on the towel "churn" by holding onto the lid, giving a motion similar to the swing of revolving churn.

Cottage Cheese—Mix what buttermilk you can spare from cooking with an equal quantity of clabbered milk, heat and drain through a tin sieve, salt and mix in the sieve and take out into bowl immediately. Wash and dry sieve. Cheese made of part buttermilk does not need cream or butter added.—American Agriculturist.

A CAVALRYMAN'S TALE.

HOW A HARD FOUGHT BATTLE WAS WON.

Fiction Is Not So Strange As It Is This True Story of the Great Rebellion.

From the Courier, Seneca Falls, N. Y.

Milton Weaver, who lives on Throop Street, Seneca Falls, N. Y., was a soldier in the late war, serving in the Third Wisconsin Cavalry. In 1862, while being transported from Janesville to Chicago, the train was wrecked by a broken axle, which threw the cars down an embankment.

With many others, Mr. Weaver assisted in rescuing his less fortunate companions, and while lifting the wreckage from the wounded men, he received an injury to his spine that rendered his lower limbs useless, besides rupturing himself. He was taken to St. Louis, where he received the best medical treatment, but without getting any relief. He was then taken to Fort Leavenworth, but with no better success. While at the latter place he was examined by the Board of Medical Examiners, who pronounced his case a hopeless one, telling him that although he might live for years, he would always be helpless.

Since then he has spent thousands of dollars, but has never been able to get any relief, and he felt that he would always be compelled to drag himself about with the aid of crutches. Four years ago he was taken worse, and was not able to get about even with the aid of crutches. It was then that he hoped, died, for the paralysis had attacked his right arm and right leg as well as left, and indeed helpless, being scarcely able to feed himself and wholly dependent on others.

He remained in this condition until a little more than a year ago, when he was induced by hearing of a former friend whose case was similar to his own, who had been to New York for treatment, but who had been told by the doctors that there was no help for him to try Dr. Williams' Pink Pills for Pale People.

Dr. Williams' Pink Pills for Pale People, had his friend's return home, had his attention called to an advertisement of Dr. Williams' Medicine Co.'s Pink Pills, and was induced to try them, with the result that he was cured. Mr. Weaver had tried so many different medicines that he felt it would be a waste of money, but as there is always hope while there is life, determined to give "Pink Pills" a trial. He did so, and was astonished to find before he had taken one box that he was better. This was in June, 1894, that he commenced taking them. He was still skeptical and carefully watched himself, thinking that the relief would only be temporary. The improvement was apparently permanent and he again commenced taking them, and before another box was gone he was able to walk and able to do light work, which he had never hoped to again. He has taken altogether only ten boxes.

Mr. Weaver was born in Seneca Falls, where, with the exception of a few years' spent in the West, he has always lived, and his condition and marvelous cure is well known and can be easily verified.

George B. Davis, of the drug firm of Davis & Seaman, says that the cure of Mr. Weaver was nothing less than a miracle, and that it has resulted in largely increased sales of "Pink Pills."

Dr. Williams' Pink Pills contain, in a condensed form, all the elements necessary to give new life and richness to the blood and restore shattered nerves. They are also a specific for troubles peculiar to females, such as suppressions, irregularities and all forms of weakness. They build up the blood, and restore the glow of health to pale and sickly cheeks. In many cases they effect a radical cure in all cases arising from mental worry, overwork or excesses of whatever nature. Pink Pills are sold in boxes (never in loose bulk) at 50¢ a box or six boxes for \$2.50, and may be had of all druggists, or direct by mail from Dr. Williams' Medicine Company, Schenectady, N. Y.

CURIOUS FACTS.

A man eighty-three years old was recently fatally injured while coasting down a hill in Connecticut.

A turnip with a human face was pulled from a garden in the village of Weiden, Germany, in the year 1628.

The herd of buffaloes in Austin Corbin's game preserve, on Oroydon Mountain, N. H., now number fifty.

Two little pet dogs discovered a fire in Chicago the other night, and were instrumental in saving a large amount of property.

Cyclists should see that their shoe laces are fastened before mounting a machine; for, as in skating, a loose lace may cause a bad fall.

It is computed that there is \$4,000,000 worth in gold and jewels at the bottom of the sea on the route between England and India.

Paris has a Turkish bath establishment where horses and dogs are treated to the luxury. They are said to enjoy it, when they get used to it.

A Washington woman, after twenty years litigation for damages with the Baltimore and Ohio Railroad, has secured a verdict of one cent damages.

The first building for Christian use ever erected in Tokyo, Japan, is only twenty-five years old and now there are ninety-two churches and chapels in that city.

Exclusive of many church societies and out of town college organizations, Brooklyn boasts about one hundred women's clubs, with total membership of more than 19,000.

There are nearly eleven million Roman Catholics in Russia, about one in ten of the whole population. In the former kingdom of Poland they form three-quarters of the population.

While digging in the side of a bank in Belfast, Me., the other day, workmen found a snake's nest, containing thirty-nine snakes, located at a point below the surface which frost would be unlikely to reach.

When an African buffalo is wounded by a hunter it is surrounded by several others, who immediately group themselves round him and help him along in their midst by shoving against his side until they have reached a place of safety.

Cast a Doubt on Iron Clads.

An unpleasant experience, throwing doubts on the efficiency of all the older British iron clads, was that of the armored turret ship Rupert, one of the coast defense vessels, which started from Plymouth for Gibraltar just before Christmas. The weather was very rough, and as soon as she left harbor she began to ship heavy seas; the hatches were battened, but the water kept pouring in, when it was found that the turret flaps instead of being watertight, were useless; and on her return to port the hull was found to be leaking as well. Steam pumps and hand pumps were kept going for two days to keep her afloat, the ship was put about and managed to reach Plymouth before the water reached the fires, the stokers working up to their knees in water. Though ordered to be ready for sea again by New Year's Day, the repairs needed will take several weeks.—New York Sun.

Big Crop of Twins.

It has just been figured out that 100 pairs of twins were born in Maine during the year 1893. Only one set of triplets is noted. They were born in Lewiston.

THE WORLD'S EARLIEST POTATO.

That's Salzer's Earliest, fit for use in 28 days.

Salzer's new late potato, Champion of the World, is pronounced the heaviest yielding in the world, and we challenge you to produce its equal! 10 acres to Salzer's Earliest Potatoes yield 4000 bushels, sold in June at \$1 a bushel—\$4000. That pays. A word to the wise, etc.

Now if YOU WILL CUT THIS OUT AND SEND IT WITH 10c. postage you will get, free, 10 packages of seeds and grasses, including Turkey, Lathyrus, Sand Yetch, Giant Spurry Giant Clover, etc., and our mammoth seed catalogue.
